

Marguerite's Place, Inc. Childcare Program

ADDRESSING THE INDIVIDUAL NEEDS OF EACH CHILD

At Marguerite's Place, Inc. Childcare Center, we offer a secure family like environment where learning is fun, potentials are discovered, and growth happens daily.

The curriculum is based on children's ability to learn through play.

Our philosophy is based on the idea of an inclusive classroom.

- By providing a holistic approach, we meet individual needs as well as provide for the whole group.
- Our multi-age classrooms approach learning based on core developmental areas with an emphasis on social emotional growth.
- Children learn best through their natural inclination to play and explore. Our learning experiences include: visual activities, stories, art, hands on activities and free play with carefully set up areas and activity choices.
